

Hygiene Catalogue

A different set of eyes

When we visit a food processing plant, we see it through a different set of eyes.

Where some see equipment and raw materials, we see risks and opportunities.

Where some see brushes, broom and mops, we see solutions to hygiene challenges. Where some say “*your work*”, we say “***your purpose***” because people who clean these facilities are on the front line of keeping our food a delight to serve and safe to eat.

Vikan has been doing this since 1898 amassing the industry’s biggest bank of hygiene and regulatory insight.

Based on this insight, Vikan has developed the world’s most effective professional range of cleaning tools, all to make sure that you can deliver each and every product you manufacture with pride and confidence.

Hygienic Hi-Flex Wall Bracket System

A hygienic, modular wall bracket. The rail is easily attached to the 4 wall mounts by sliding it on from the right or left side. The Grip band modules and Hook modules can then be clicked on the rail and "locked" in place using one of the many small "notches" in the rail. These ensures that the modules can not slide from side to side. The system is supplied with 3 Grip band modules and 2 hooks. Modules and rails are easy to disassemble for cleaning or replacement.

Stainless Steel (AISI 304)

Pipes and Tube Brushes

Vikan offers a very wide range of highly effective, durable tube and pipe brushes in various sizes for use in a multitude of applications in every industry settings.

- **Tube Brush Heads** - Designed for cleaning longer straight or slightly curved tubes such as level gauges on tanks, these heads fit on any Vikan flexible handle. Choose our flexible nylon handle for tubes with sensitive walls
- **One-Piece Pipe Brush** - Designed for use in straight-pipe applications, such as meat mincers, where a 90 mm diameter is optimal.
- Made entirely of EU and FDA food contact approved materials
- Vikan quality ensures long service life
- Hygienic drop-shaped hanging hole facilitates cleaning and fits all Vikan wall brackets

Squeegees

Effectively remove both liquids and debris with Vikan's pioneering range of squeegees.

- **Floor and Hand Squeegees** – featuring high density foam blades and easy to replace blade cassettes. Highly efficient at removing liquids from surfaces and cost effective.
- **Hygienic Squeegees** – featuring twin rubber blades in an easy to remove cassette for hygienic cleaning and maintenance. These squeegees are heat and chemical resistant and highly efficient at removing liquids and semi solid from surfaces.
- **Ultra-Hygienic Squeegees** – a fully molded, hygienically designed single flexible blade. Very effective at removing liquids, semi solid and loose dry material from any surface, anywhere.
- **Condensation Squeegee** – designed to remove condensation from ceilings and overhead pipework. Condensate can be drained to the floor or collected in a bottle that fits on to the water-fed Handle.

Scrapers

Scrape any surface free of stubborn debris with Vikan extensive range of effective scrapers. These scrapers remove sticky, oily, baked on, dried and any other debris from any work surfaces.

- Stainless steel scrapers are great for removing stubborn debris from tough surfaces, like tiles, hot and cold surfaces.
- Plastic scrapers can be used on surfaces where a stainless steel blade might damage the surface being scraped.
- Nylon scrapers allow the scraping of very hot and very cold surfaces.
- Flexible plastic scrapers are available also in metal detectable version.
- Paddle scrapers are available in nylon and polyethylene.

Item Code 2908x**Table and Floor Scraper**

Remove stubborn food debris from floors and other surfaces with this Table and Floor Scraper. Features a very durable and solid stainless-steel blade. Can be used with any Vikan handle.

**Item Code 2909x****Scraper with Flexible Steel Blade**

Ideal for cleaning powder towers and other surfaces where extra force is needed to loosen dirt, this scraper has rounded edges and a flexible steel blade to protect surfaces from scratching. It can be used with any Vikan handle.

**Item Code 29125****Table and Floor Scraper – White**

Ideal for removing stubborn food debris from floors and stainless steel surfaces and equipment, this flexible nylon scraper can be used with any Vikan handle.

**Item Code 4008x****Stainless Steel Hand Scraper**

Great for removing sticky deposits that would clog a brush and for dealing with dried or burnt-on foods and ingredients, this Hand Scraper features a stainless flex steel blade with protective rounded corners, a high-strength attachment, and a special ergonomic finger rest.

**Item Code 4009x****Stainless Steel Hand Scraper**

Great for removing sticky deposits that would clog a brush and for dealing with dried or burnt-on foods and ingredients, this Hand Scraper features a stainless flex steel blade with protective rounded corners, a high-strength attachment, and a special ergonomic finger rest.

**Item Code 4010x****Stainless Steel Hand Scraper with Threaded Handle**

Good for removing sticky, semi-liquid deposit, like dough, confectionary gels/pastes, soft chocolate, cheese or for removing dried or burnt on deposits, like hardened chocolate, caramel, dried/burnt bakery debris, compacted dried powders, dried/burnt meat, fish or vegetable deposits etc. because they enable the user to exert more mechanical force against the dried-on soil than can be achieved with a brush.

Item Code 4011x**Stainless Steel Hand Scraper with Threaded Handle**

Great for removing hard-to-reach sticky deposits and dried or burnt-on foods or ingredients, this Scraper features a stainless flex steel blade with protective rounded corners, a high-strength attachment, and a threaded handle that fits any Vikan color-coded extension handle. While not intended for floor cleaning proper, this product can be used to remove lighter soils on floors.

Dough Cutter/Scraper Flexible Blade

Vikan's Dough Cutter/Scraper is a baker's best companion.

It cuts and handles dough, removes sticky messes that would clog a brush, and deftly deals with burnt-on foods on tables and cutting boards.

The flexible, 0.5 mm stainless-steel blade is excellent at cutting many types of dough, cooked pastries, and other soft foods.

The blade is slightly rounded on the edges to avoid cutting users' hands.

The polypropylene grip is durable and molded securely around the blade.

An ergonomic finger rest makes the Dough Cutter/Scraper easy to grip and use repetitively.

The drop-shaped hanging hole makes storage on a wall bracket or shadow board easy.

This scraper is an essential tool for the food industry, including processing plants, commercial kitchens, restaurants, and supermarkets.

Handles

Every head needs a handle and with Vikan the range of handles is nearly comprehensive as the heads they are designed to fit on to. Whether you need a plastic, stainless steel, aluminum or one hygienically designed, short, long, telescopic, water-fed or fully color coded, we are sure to have one that suits your needs.

- **Ultra Hygienic Handles**, primary designed for use with the color coded product range are fully molded and easy to clean. The Ultra Hygienic Handles compliment the UST broom range and Ultra Hygienic Squeegee perfectly.
- The **Ultra Hygienic Mini Handles** are ideal for use with any hand held Vikan product.
- The lightweight, ergonomically designed **Aluminum Handles** minimize the risk of occupational injury. The Water-fed versions feature a quick release hose connections and insulated sleeves for a comfortable grip.
- The **ridged Stainless-Steel Handles** are strong, durable, chemical resistant and suitable for use with all Vikan color coded products.
- The **Flexible Stainless Steel** and the **Nylon Handles** mounted on Vikan twisted wire brush heads facilitate cleaning of curved pipework.
- **Telescopic Handles** enable cleaning at height of remote surfaces easily and effectively.

29255 - Aluminum Telescopic Handle - White

This short telescopic handle is ideal for cleaning inside tanks with a small entry point, such as lidded tanks. It can be used for wide or deep tanks where the standard extendable handle (product no. 2975x) is too long.

Dustpan & Dustpan Sets

Collect debris of any kind and dust from floors and work surfaces using Vikan's range of dustpans and dustpan sets.

- Color-coded, food contact compliant dustpan with fully aligned edge make sure all dust and debris are collected.
- Long Handled dustpans eliminates the need to bend over or kneel.
- Color Coded Closable Dustpan Sets complete with angle cut bristle broom, for ergonomic, all in one sweeping.

Item Code 5660x

Dustpan

Collect food debris and dust from floors and work surfaces with this ergonomically designed Dustpan. Ideal for food industry use, it features thick wall for strength, durability and ease of cleaning. Use with Hand Brushes 4587 and 4589.

Item Code 5665x

Closable Dustpan Set with Broom

This solidly built dustpan is very easy for users to use with one hand while the other holds a broom. Emptying is just as easy as using it—the lid can be locked into place by pressing the handle backward until there is a click. Unlock it by pulling forward. In use, the dustpan lip is built to seal tightly to the floor to prevent debris from sliding under the dustpan, even if it's placed close to a wall. The interlocking broom system and narrow, upright design make storage a breeze, as the whole system can stand on its own, with the broom tucked into the dustpan.

Item Code 5662x

Upright Dustpan

The contact lip is designed for easy and efficient sweeping into the dustpan. The outer front surface has a raised area to prevent debris from falling out of the dustpan. The enlarged rear and side walls enable the dustpan to hold larger volumes of debris.

Item Code 5666x

Upright Dustpan & Broom Set

The contact lip is designed for easy and efficient sweeping into the dustpan. The outer front surface has a raised area to prevent debris from falling out of the dustpan. The enlarged rear and side walls enable the dustpan to hold larger volumes of debris. The very effective, lightweight broom can be used for sweeping both dry and wet debris. The brush pattern is designed using 2 filament diameters. The outer row of filaments is softer than the middle row, which gives a very effective sweeping quality. The filaments under the scraping edge are angled to facilitate sweeping close to walls and corners as well as under workbenches etc. An effective scraping edge has been implemented in the design to enable loosening stubborn debris from the surface.

Mixers

Vikan offers a wide variety of mixers, stirrers and paddles manufactured in food contact compliant plastic or nylon, designed for virtually every processing application.

- Both excellent to mixing all liquids and viscous products.
- Nylon Stirrer is good for use with hot foods and liquids.
- Fully moulded one-piece construction, is easy to clean.
- Featuring a scraping edge to help remove product from the side of mixing vessels.
- Available in versions with holes that allow the ingredients to pass through the blade and easy stirring.

Water Guns & Hoses

We offer water guns and hoses for use in variety of industries and applications. Versatile and effective, our water guns are used to clean everything from food service areas to changing rooms at sports facilities. Our hoses are designed for use with hot or cold water.

- Gun sprayers feature functional design with variable water pressure.
- Water guns available with angled jets to hit hard-to-reach places.
- Cold water hoses can be used with water up to 40° C
- Hot water hoses are designed for use with water up to 70° C

Item Code 93229

Spraying Gun with ½" (Q) Coupling Black

This Spraying Gun is used for cold water flushing and cleaning. An adjustable nozzle allows for focused jet or full spread. Features a steplessly variable water supply and a trigger equipped with a closing and opening device and a 1/2" clutch housing connection.

Heavy Duty Water Gun

The Heavy Duty Water Gun is suitable for cleaning floors and machinery, and for rinsing off work surfaces and walls after chemical foaming. Determine the jet pattern by squeezing the rubber insulated trigger. Adjust the water jet with a screw at the end of the gun. An arrow on the gun shows the water spray direction. Use 0712 1/2" or 0715 3/4" hose nipples, which can be screwed into the bottom of the gun. You need one of these nipples to connect a hose to the gun.

Foaming Equipment

Vikan Foaming Equipment can be used on different surfaces in a variety of industries. Versatile, effective and with minimal generation of aerosol, these tools are used to clean everything from food service areas to changing rooms at sport facilities and even swimming pools. They work purely with the pressure from your water supply system.

- Sprayers feature functional design with continually variable water supply.
- Ergonomically designed.
- Foam is applied without generating aerosol.
- Color coding facilitates chemical identification.

Item Code 9303x

Ergo Foam Sprayer including Jet Spray 2.5 Liters

Whether you're cleaning walls in a food processing environment or washing the floors in showers, fitness studios, pools, or more, the Foaming Set gets the job done with a constant chemical dosage (0.4-10%, as per manufacturer's recommendations). It can handle 8 bars of pressure and has an ergonomic grip that won't slip, even when wet. Each version comes in 5 colors and has a set of 15 color-coded nozzles for different chemical concentrations. *Never allow chemicals directly through the foaming gun.*

Suction Hose for Injector 93139 & 93149 White

Suction hose with filter for foam injector and spray injector.

Item Code 93189

Lid for 9301 & 9305 – Black

Use this Plastic Lid to protect against chemical evaporation when the container is not in use. If the container tips over, the lid will also provide protection against chemical spills.

Item Code 93209

Combi Water Gun for Foam Sprayer with ½" (Q) Coupling – Black

Mount with a nozzle for use in connection with foam cleaning. The water gun has a functional design with continuously variable water supply. The trigger is equipped with a closing and opening device. Connected with 1/2" clutch housing.

Item Code 93239

Water Gun for Foam Sprayer with ½" (Q) – Black

This is a replacement piece for the Foaming Set (9303x). A rubber coating ensures a good grip during use, even in wet conditions. The foaming gun has a 1/2" nozzle that can connect to a 1/2" Q coupling. The front of the foaming gun can be connected to the rinsing nozzles, 9350, 9352, and 9354. Never allow chemicals to flow directly through the foaming gun.

Item Code 9340

SafeOne Back Flow Prevention ½" (Q)

For use with foam sprayers 9300, 9301, 9305 and 9306 as protection against chemical backflow into the water supply system.

Item Code 9345

Hose Suspension Bracket

Hose suspension for wall mounting. Maximum 20 meter hose.

Item Code 9348

Suspension Bracket for Foam Sprayer 9303x & 9305x

Hose and foam sprayer
suspension for wall mounting.
Maximum 20 meter hose.

Couplings and Accessories

Vikan offers high quality couplings that make attaching and changing hoses and sprayers quick and easy.

- Couplings come in ½" and ¾" sizes.
- Quick fit couplings are designed to make it easier to mount hoses on water taps, handles and foaming equipment.
- Rubber Bands are the hygienic solution to secondary color coding. The bands fits handles, vacuum cleaner nozzles and all other Vikan products.
- Metal Detection Kit is used to check the detectability of Vikan products and calibrate the metal detectable accordingly.

Item Code 5700x

HyGo Mobile Cleaning Station

NEW

Vikan's HyGo is the food and beverage industry's first mobile cleaning station to combine hygiene, efficiency, and maneuverability in a purpose-built solution. Beyond elevating cleaning efforts, HyGo also conquers space challenges, lost equipment, and wasted time. HyGo easily navigates tight spaces like doorways with its narrow frame and 360-degree wheels. The tool modules and brackets can be customized and can adapt as your needs change. As standard, the tool brackets can mount up to five tools. With additional brackets purchased and added to it, the HyGo can hold up to 12 mounted tools. The two rear castors can be locked. The upper tray can carry up to 12 kgs and the lower tray can carry up to 20 kgs. HyGo can be disassembled, and the individual parts can be dry cleaned or wet cleaned.

Item Code 0700

Tap Coupling with reducing piece Male ½" (Q)

Fits water tap with ½", ¾" or M22 mm outside thread. When the bush is removed, the coupling fits a ¾" external thread. When the bush is turned upside down the coupling fits a M22 mm external thread.

Selecting the right Cleaning Tools

TIPS & TRICKS

Vikan is the world's leading supplier of hygienic cleaning tools for the food and beverage processing sector. They develop, manufacture and market professional, compliant cleaning solutions that help minimize the risk of product contamination.

They know the many different hazards you must control in your diverse food and beverage production environments and can support you in maintaining those environments in a way that protects your products and your business.

Recognized leaders in research and product development, Vikan has been setting standards in effective, durable cleaning tools and advanced services worldwide for decades.

Vikan profound knowledge of the food and beverage industry, coupled with their extensive product range, unique model for co-innovating with customers, and service-minded approach means that Vikan are ready and able to support you with all your hygiene and product safety challenges.

The food and beverage sector requires strict adherence to sanitation rules and regulations. Tools from Vikan are made out of tough, compliant materials such as polypropylene and stainless steel. Unlike foamed plastic or wooden tools, our high-quality products have smooth surfaces for easy clean-up and better hygiene. Our tools are hygienically designed, which makes them easier to clean and less likely to harbor bacteria.

Vikan tools come in up to twelve colors, making them ideal for integration with color-coded plans. Color-coding helps prevent cross-contamination between raw and finished products, as well as keeping allergens separated.

Regardless of your operation's size and complexity, Vikan has the tools and expertise to help you execute your color-coding plans.

Dairy Processing

Brushware

- Choose stiff bristled brushes for removal of dried on dairy product. Use the brush on its own (dry cleaning), or in combination with water, detergent/sanitizer (wet cleaning).
- Choose medium bristled brushes for removal of wet semi-solid soils, e.g., curd solids.
- Choose a soft bristled brush for removal of loose dry soils, e.g., dried milk powder.

Squeegees

Choose a squeegee that is appropriately effective, hygienically designed, and durable e.g.

- Foam bladed squeegees are highly effective at removing liquids like milk or whey from surfaces, but the blades are difficult to clean and disinfect and wear quickly.
- A fully-moulded, single-bladed squeegee is easy to clean and disinfect; is more durable; and may be better than a brush for removal of loose wet soils, like cheese curds, and powders like dried milk, as it doesn't clog.

Scrapers

Choose scrapers that effectively remove the soil but don't damage the surface.

Metal blade scrapers may scratch metal or plastic surfaces making the surface more difficult to clean and increasing foreign body risk.

Dedicated colors

Use equipment of a dedicated color for a dedicated task, for example,

- Green for products that contain lactose, and Pink for those that are lactose-free.
- Red for raw-milk production areas, and Yellow for processed product areas.

Product handling tools

Shovels, scoops, jugs and buckets should be made of appropriately product contact compliant material.

Bakery Processing

Brushware

- Choose a stiff bristled brush for removal of dried or baked-on product debris. Use the brush on its own (dry cleaning), or in combination with water, detergent/sanitizer (wet cleaning).
- Choose a soft bristled brush or broom (in combination with a dustpan or shovel) for removal of loose dry soils, e.g., flour, seeds.

Squeegees

- A fully-moulded, single-bladed squeegee may be better than a brush for removal of loose dry powders like flour, as it doesn't clog and is much quicker and easier to clean.

Scrapers

- These can be used to loosen dried on dough or baked deposits.
- Choose a scraper with a blade material that effectively removes the soil but doesn't damage the surface – metal blade scrapers may scratch metal or plastic surfaces making the surface more difficult to clean and increasing foreign body risk.
- Nylon scraper blades are heat-resistant and can be used for cleaning of hot oven and cooking surfaces.

Dedicated colors

Use equipment of a dedicated color for a dedicated task, for example,

- Blue for products that contain gluten and Orange for those that are gluten-free.
- Red for raw product areas, and Green for baked product areas.

Product handling tools

- All equipment that comes into contact with food or food contact surfaces, including scrapers, shovels, scoops, measuring jugs, stirrers, and buckets, must be made of appropriately food contact compliant materials.

Meat Processing

Brushware

- Choose detail cleaning brushes to clean in nooks and crannies and prevent biofilm build-up.
- Choose hard bristled brushes to aid the surface washing action during wet cleaning.

Squeegees

Choose a squeegee that is appropriately effective, hygienically designed, and durable, for example,

- Foam bladed squeegees are highly effective at removing liquids, like blood or brine from surfaces, but the blades are difficult to clean and disinfect and wear quickly.
- A fully-moulded, single-bladed squeegee is easy to clean and disinfect and more durable. It may also be better than a brush for removal of soils like minced meat, as it doesn't clog.

Scrapers

Scrapers, shovels, scoops, and buckets should be made of appropriately food contact compliant materials, and be of a dedicated color for a dedicated task, as appropriate based on risk, e.g.,

- Blue for cleaning of food contact surfaces and Brown for cleaning of non-food contact surfaces.
- Green for raw meat production areas, and Yellow for processed product areas.

Sponges and scouring pads

- Sponges and scouring pads are difficult to decontaminate after use and should be disposed of immediately after use.

Confectionary Processing

Brushware

- Fine bristle brushes tend to clog quickly and be difficult and time consuming to clean when used with fine dry powders like cocoa, icing sugar, starches, and gelatin.
- Choose medium bristle brushes to clean up larger loose dry soils like granulated sugar, cocoa beans and nibs, dried fruit and nuts, chocolate chips etc.
- Choose stiff bristled brushes to remove sticky, sugary and fatty deposits as part of a controlled wet clean.

Squeegees

- A fully molded, single-bladed squeegee is a great alternative to the use of a fine bristle brush for removal of fine dry powders like cocoa, icing sugar, starches and gelatin. They don't clog and are much easier and faster to clean.
- They also work well for cleaning surfaces of molten confectionary.

Scrapers

- Scrapers are an effective way of removing set, and semi-liquid sugar confectionary from surfaces. Take care to choose a scraper blade material that effectively removes the soil but doesn't damage the surface being cleaned.

Dedicated colors

Use equipment of a dedicated color to minimize the risk of cross-contamination, for example,

- Orange for products that contain gelatin
- Green for those that are gelatin-free

Product handling tools

- Shovels, scoops, jugs, stirrers, and buckets should be made of food contact compliant materials and preferably be of a contrasting colour to the food to aid visual detection in the food.

Chilled Ready-To-Eat Processing

Brushware

- Select brushware of good hygienic design (easy to clean and disinfect) and frequently clean and disinfect them to minimize the risk of biofilm formation, and cross-contamination of microbes, allergens, and food ingredients.
- Select brushware with excellent bristle retention, to minimize foreign body contamination of your product.

Squeegees

- A fully molded, single-bladed squeegee is a great for removing liquids from surfaces and can be a good alternative to a brush for the removal of particulate debris. They have the added advantage of not clogging and being quicker and easier to clean and disinfect.
- Hand-held versions work well for cleaning food contact surfaces.

Color-coded segregation

Use color-coding to segregate areas and equipment and minimize the risk of cross-contamination. For example;

- Designate the low-risk areas as Green, and the High-risk area as Red.
- Use Brown cleaning equipment for non-food contact surfaces and blue for food contact.
- Use purple cleaning and food handling tools exclusively for use with a controlled allergen.

Product handling tools

- Shovels, scoops, jugs, stirrers, and buckets should be hygienically designed, made of food contact compliant materials, and preferably be of a contrasting color to the food to aid visual detection in the food.

Dry Snacks Ready-To-Eat Processing

Brushware

- Fine bristle brushes tend to clog quickly and be difficult and time consuming to clean when used with fine dry powders like seasonings.
- Choose medium bristle brushes to clean up larger loose dry soils like nuts, seeds, crisps, and popcorn etc.
- Choose stiff bristled brushes to remove sticky, sugary and fatty deposits as part of a controlled wet clean.

Squeegees

- A fully molded, single-bladed squeegee is a great alternative to the use of a fine bristle brush for removal of fine dry powders. They don't clog and are much easier and faster to clean.
- They also work well for cleaning surfaces of excess oil and grease.

Scrapers

- Scrapers are an effective way of removing burnt on snack debris. Take care to choose a scraper blade material that effectively removes the soil but doesn't damage the surface being cleaned.

Microfiber

- Mops and cloth can be use dry or damp.
- Used dry they are very effective at removing allergen residues from surfaces.
- Used damp they can remove grease build-up from the sides of equipment and walls, even without chemicals.

Dedicated colors

Use equipment of a dedicated color to minimize the risk of cross-contamination. For example,

- Purple for products that contain gluten, and Green for those that are gluten-free.

Product handling tools

- Shovels, scoops, jugs, stirrers, and buckets should be made of food contact compliant materials and preferably be of a contrasting colour to the food to aid visual detection in the food.
